

## Active Harmonic Filter ecosine active sync

- Most effective harmonic mitigation up to the 50<sup>th</sup> order, parameter setting for even and odd harmonics
- Compact active harmonic filter for 3-phase loads with and without neutral wire
- <5% THDi achievable even on most complex mixed loads and changing load profiles
- New modular design with intelligent system approach offering tailored solutions for different applications and customers
- 3-Level IGBT inverter topology for reduced power losses
- Extended temperature range of modules up to 50°C
- Ultra-fast and dynamic reactive power compensation (inductive and capacitive)
- Load balancing and unloading of neutral wires
- Flicker compensation (if caused by reactive power)
- Compliance with IEEE 519, EN 61000-3-12 and other power quality standards
- User-friendly, easy to install and maintain

### Approvals

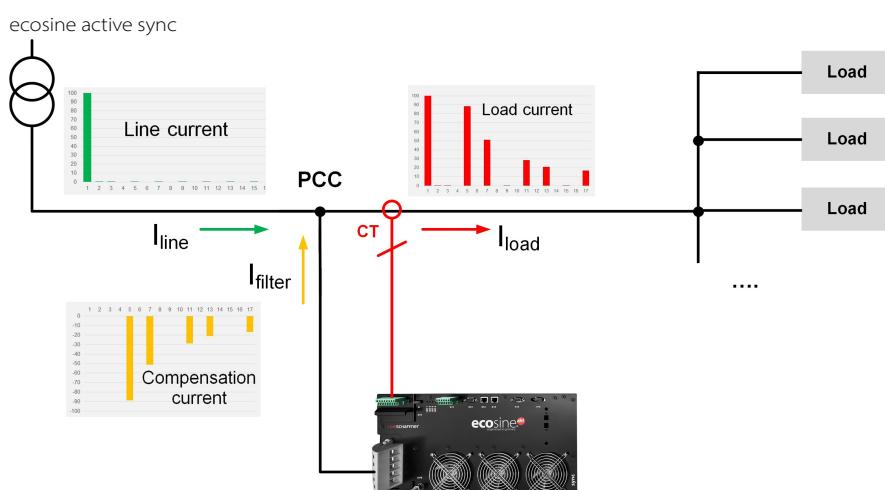

### Features and benefits

Based on the broad knowledge and experience in terms of solutions and applications in power quality the Schaffner Group has developed a new generation of active harmonic filters. The new modular ecosine active sync series offers fitted and economical solutions for the most demanding harmonic mitigation challenges with any kind of non-linear load involved. Ecosine active sync filter series provides a solution concept which is modular, compact and can be used as stand-alone modules or as system solution. The optional sync module offers a smart load Management of the filter's usage and allows redundancy which guarantees a smart power quality solution in the era of Industry 4.0. Schaffner provides active harmonic filters with excellent performance in solving power quality problems focusing on customer needs and application demands for cleaner and smarter energy.

### Typical applications

- Building technology
- Automation industry
- Data centers
- Elevators
- Cement industry
- HVAC installations
- Battery charges
- Oil and gas exploration
- Paper mills
- Ship propulsion
- Steel industry
- Tunnel ventilation
- UPS
- Water/wastewater treatment
- Welding equipment
- Wind turbines
- Machines and Automation

## Front view of cabinet with SYNC300A

## Ecosine active sync - Display Module LCD

### Function

The display module is used to monitor the measured values of the three-phase network and to change the filter parameters. One display module fits for all power modules and can be used in any of the system setups, whether it is single power module, Double Power Pack or cabinet version.

## Ecosine active sync - modular system approach

The intelligent and modular system approach of ecosine active sync series offers tailored and most efficient filter system solutions:

### Ecosine active sync - 60 A wall - IP20

- | 1 ecosine active sync power module incl. CT module
- | 1 display module
- | Wall-mount (book or flat mounting possible) or Rack-mount (inside slide-in-technology cabinet)

### Ecosine active sync double power pack (DPP) - 120 A - IP20

- | 2 ecosine active sync power modules
- | 1 CT module
- | 1 High Speed Bus patch cable
- | 1 display module
- | Master-Slave architecture
- | Wall-mount (book or flat mounting possible) or Rack-mount (inside slide-in-technology cabinet)

### Ecosine active sync - 60 A - IP54

- | 1 ecosine active sync power module incl. CT module
- | 1 display module

### Ecosine active sync - 120 A - IP54

- | 2 ecosine active sync power module incl. CT module
- | 1 display module

### Ecosine active sync - 180 A - IP54

- | 3 ecosine active sync power module incl. CT module
- | 1 display module

### Ecosine active sync - 240 A - IP54

- | 4 ecosine active sync power module incl. CT module
- | 1 display module

### Ecosine active sync - 300 A - IP54

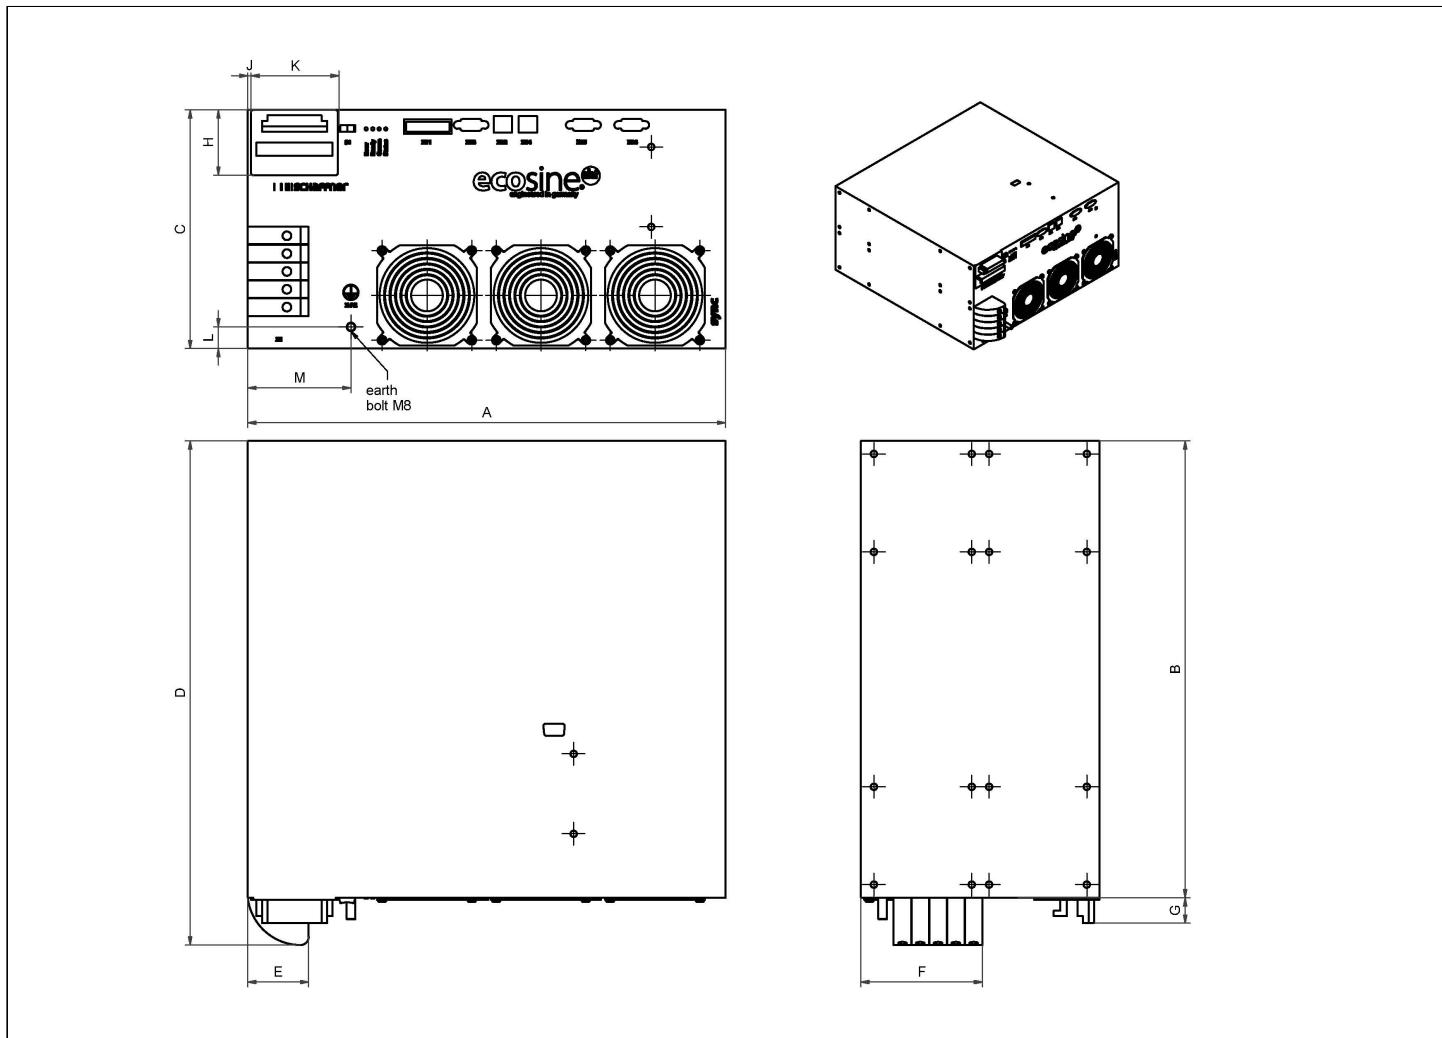

- | 5 ecosine active sync power module incl. CT module
- | 1 display module

### Sync Module - master communication module for ecosine active sync - IP20

- | Flexible installation with current transformers on mains or load side; one simple CT connection point for all modules
- | Intelligent load and energy management
- | Simple and modular installation (wall-mount or rack-mount); recommended for 180 A and more
- | Easy filter scalability and extension of mitigation current beyond 300 A; one sync module can connect and coordinate up to 5 power modules (5x60A) in parallel; higher mitigation current rates are possible by paralleling the sync modules, e.g. for 480 A active harmonic filter, 2 sync modules and 8 power modules are required
- | Available as part of the ecosine active sync cabinet (see selection table) or as an option for later upgrade or wall-mount
